## Conformal Coating

Connect Tech recognizes the harsh reality that many embedded systems find themselves operating in unusually hostile environments. When conformal coating is required to protect your application against substantial moisture, dust, chemicals or temperature extremes, we can help.

### Standard Conformal Coating Options

***Protect your circuitry when exposure to unique environmental circumstances is inevitable.***

**Humiseal 1B31:** A fast air drying, single component, acrylic coating that provides excellent moisture and environmental protection for printed circuit assemblies.

**Dymax 9-20557 LV:** Multi-Cure 9-20557-LV is excellent for encapsulating, potting, sealing and bonding. Coating resists yellowing, vibration, impact and thermal shock. The coating exhibits excellent adhesion to most solder masks, and fluoresces for easy in-line quality control.

**Dow Corning 1-2620:** Protective coating for rigid and flexible circuit boards. These one-part, self-priming coatings cure to flexible, transparent elastoplastic coatings ideally suited for electronic printed wiring board (PWB) applications, particularly those requiring toughness and abrasion resistance.
